**NOVA SCOTIA**

## Shaping the future of offshore wind in Nova Scotia.

250

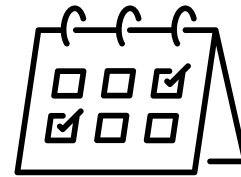

250 estimated in-person participants from Atlantic Canada.

50+

50+ presentations and 2 plenary sessions.

1

one (1) day filled with networking, sharing, and learning.

### KEEPING PACE

**Purpose** - Discuss research findings, identify the gaps in R&D, and how to fill these areas with knowledge.

**Focus** - Explore themes of policy and regulation, environment, and tech.

**Action** - Participate in sessions, plenaries, keynotes, a student program, and poster presentations.

### STEADILY PROGRESSING

Researchers and technical experts are ready to share their insights to assist leaders in the development of the offshore wind sector and the sustainability in the North American eastern seaboard region and globally.

The R&D Forum will explore nine topics:

- supply chain
- permitting
- socioeconomics
- grid interconnection
- geoscience and geotechnology
- environmental effects
- project financing
- resource assessments
- marine spatial planning
