

# 2025 Atlantic Canadian Conference on Energy System Modelling

**Chris Milligan**

Director, System Planning & Grid Integration  
Nova Scotia Power

Chris Milligan leads the System Planning and Grid Integration team at Nova Scotia Power, responsible for all aspects of long-term resource, transmission, and distribution planning as well as transmission and substation engineering. Chris' team leads the Integrated Resource Planning process for Nova Scotia Power, which develops and evaluates pathways to decarbonization and electrification in Nova Scotia. Chris is a professional engineer with 10 years of experience with Nova Scotia Power in both Planning and Operational roles, and previous experience in the natural gas and telecommunications utility sectors.
