

# 2025 Atlantic Canadian Conference on Energy System Modelling

**Cameron Wade**  
**Founder and Principal**  
Sutubra Research

Cameron Wade is the founder and principal of Sutubra Research, a consultancy specializing in power system and integrated energy system modelling. He works with governments, utilities, independent power producers, and NGOs across North America, often collaborating with leading academics to develop advanced models that support the energy transition. Cameron has contributed to national model intercomparison studies in Canada and the U.S., and his analysis on hydrogen tax credits was recently cited by 13 U.S. Senators. Cameron holds MSc degrees in Mathematical Engineering and Physics and frequently presents his work at international conferences, including recently at New York Climate Week.
