

2025 Atlantic Canadian Conference on Energy System Modelling

Elizaveta Kuznetsova, PhD
Head of Energy Value Chains
ESMIA Consultants

Bojana Zindovic has almost 20 years of experience working in the energy industry. She first started her career in Toronto Canada, working mainly with the Independent Electricity System Operator in various capacities supporting the clean energy transition by managing the province's first ever renewable energy FIT contracts and then supporting various energy efficiency funding program. She went on to acquire a master degree in Energy Management at the Technical University of Berlin, and has since worked at Elia Grid International supporting international courtiers with their clean energy transitions. Such projects include: helping the Kingdom of Saudi Arabia establish a resilience framework to guard against unprecedented power system shocks. Enabling EU community members to harmonize with EU network codes and join EU's liquid and stable market to reap the benefits of integration. Developed market and technical tools to enable orderly interconnection practices that both unlock transmission interconnection and help operators manage congestion. Helped develop frameworks for operation and exchange on DK2/DE borders to support Hybrid Interconnectors. She is now also supporting the growth of EGI's Canada's office together so please reach out and connect with her.
