

2025 Atlantic Canadian Conference on Energy System Modelling

Florian Mitjana

**Postdoctoral Researcher - Decarbonization of the Electricity
System and Machine Learning**

HEC Montreal

Florian Mitjana is a professional researcher at HEC Montréal. He holds a PhD in applied mathematics from the Université Paul Sabatier in Toulouse, France. His research interests include energy policy in the context of power system decarbonization in northeastern North America, optimization of multi-reservoir hydropower systems, and the application of reinforcement learning to energy problems.
