

2025 Atlantic Canadian Conference on Energy System Modelling

Steven Wong

Senior Technical Advisor, Renewable Energy Integration
CanmetENERGY/Natural Resources Canada

Steven Wong has been a researcher with the Government of Canada's Department of Natural Resources in the CanmetENERGY laboratory since 2010. Within, he is a member of the Renewable Energy Integration Group whose activities include working with partners in government, industry, and academia to "act as a supplier and catalyst for a sustainable energy future for Canada." Dr. Wong obtained a Master's of Management Sciences in 2005 and a PhD in Electrical Engineering (power systems) in 2009 from the University of Waterloo, where he pursued studies in electric power systems and operations research. At CanmetENERGY, his responsibilities include planning and conducting research studies and facilitating relationships between industry, academics, and government. His areas of interest include bulk and distribution system planning and operation encompassing renewable energy integration, distributed flexibility, storage and grid modernization concepts. He also serves as an adjunct associate professor at the University of Waterloo.
