

An abstract, green wireframe architectural design featuring a large, curved, multi-tiered structure resembling a modern building or a large-scale sculpture. The design is composed of numerous thin, green lines forming a complex, geometric pattern. The structure is set against a white background.

2025 Atlantic Canadian Conference on Energy System Modelling

Wayne Groszko
Applied Energy Research Scientist
Nova Scotia Community College

Dr. Wayne Groszko works as Applied Energy Research Scientist with the Nova Scotia Community College. There, a team of research associates and students investigates practical solutions to industry and community challenges, with a focus on renewable energy, energy storage, and smart grid management. Over the past four years, the team has helped develop and test thermal energy storage solutions involving phase change materials.
