Recent Questions and Answers

Q1: Are there assurances that the Government of New Brunswick will collaborate to facilitate access to its databases without fees? Specifically for wells and mines.

A1: All Department of Natural Resources databases and publications are available online without cost.

Q2: Do the proponents require registration with the Association of Professional Engineers and Geoscientists of New Brunswick (APEGNB)?

A2: No. However, it would be advantageous to have at least one team member on the project team registered.

Q3: Are you accepting proposals for parts or components of the overall RFP?

A3: Proposals must address the full Scope of Work as outlined in Section 4.0.

Q4: Has any of the data gathering or compilation been packaged and made available to project proponents?

A4: No data will be available to proponents at the proposal stage. Data gathering and compilation will be discussed at the kick-off meeting with the awarded recipient. Please assume in your work plan that this has not yet been completed.

Q5: Will Net Zero Atlantic be the contracting counterparty directly?

A5: Yes. The successful proponent and Net Zero Atlantic will enter into a direct contract agreement.
